Power Over Ethernet

- · IP Extender Over Coax allows you to use existing coax cable to send IP camera signals (speed is dependent on cable length and coax type)
- Single channel set transmits data network signal up to 1,000 meters over any pair of 2-wire such as Cat5, coaxial cable and power line (200MPS max)
- · HDMI Extender used in pairs uses to extend HDMI signals over category cables as alternative to long expensive HDMI cables
